## FSA30

## Electronic Level Switch and Transmitter

- up to 2 switch points
- analogue output 4... 20 mA or $0 . . .10 \mathrm{~V}$
- IO-Link communication interface
- rotatable $320^{\circ}$ display \& electrical connection
- resolution: $\mathbf{8}$ or 12 mm
- redundant measurement system, direct measurement
- suitable for media of density $\mathbf{>} \mathbf{0 . 6} \mathbf{~ g} / \mathbf{c m}^{\mathbf{3}}$
- applicable for foam formation
- max. temperature: $80^{\circ} \mathrm{C}$ max. pressure 15 bar
- measuring lengths: $\mathbf{2 5 0} . . \mathbf{3 0 0 0} \mathbf{~ m m}$

## Typical applications:

The sensor is used wherever small to medium fill levels of even aggressive media are measured. The measuring length between 250 and 3000 mm allows flexible use in many containers.
The nature of the FSA30 level switch and transmitter makes it particularly suitable for use in hydraulic, lubrication and cooling systems.
Because of their on-site display, the FSA30 are also ideal for installation at process-relevant points for visual inspection.

## Description:

The level transmitters of the type series FSA30 operate according to the float principle with magnetic transmission. The float is lifted by the rising liquid level in the tank and actuates the contacts of a reed contact / resistance chain in the sliding tube by the magnetic field of the permanent magnet located in the float.
The output signal is a voltage proportional to the level. Due to the electronics used, up to two switching points, an analogue signal (current or voltage) and IO-Link are available for data use.

## Technical Data:

| Sensor element: | Reed switch |
| :---: | :---: |
| Materials: |  |
| Wetted parts: |  |
| Stem (fitting, tube): | brass |
| Float: | NBR foam |
| Seals: | FKM, EPDM or NBR |
| Electronics housing: | stainless steel VA2A, PA / PC |
| Operating elements: | 3 easy-response pushbuttons |
| System of protection: | IP65 / IP67 |
| Protection class: | III |
| Electrical connection: | Plug M12 $\times 1$ mm, 4-pin / 5-pin (depending on output code) |
| Process connection: | see order code |
| Float BN30 |  |
| Density Medium: | min $0,60 \mathrm{~g} / \mathrm{cm}^{3}$ |
| Depth of immersion: | $20 \pm 2 \mathrm{~mm}$ at density 1 , $\varnothing 30 \mathrm{~mm}$, height 44 mm |
| Dimension: | $110 \times 41 \mathrm{~mm}$ (without plug connector and sliding tube) |
| Weight: | appr. 350 g (without sliding tube) |
| Total length (L0): | $250 \mathrm{~mm}, 370 \mathrm{~mm}, 410 \mathrm{~mm}$, 1000 mm , others on request |
| Repeatability: | $\pm 1$ digit (without turbulence) including temperature influence |
| Resolution: | 8 or 12 mm |
| Max. pressure: | 15 bar |
| Temperature range: |  |
| Medium: | $-25^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ |
| Ambient: | $-20^{\circ} \mathrm{C} \ldots+70^{\circ} \mathrm{C}$ |
| Storage: | $-30^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ |
| Power supply: | $15 . . .32 \mathrm{~V}_{\mathrm{DC}}$, reversed polarity protected (SELV, PELV) |
| Digital display: | 4-digit 14-segment LED display, red, digit height 9 mm |
| Error display: | LED red and alphanumeric display |
| Power consumption: | approx. 50 mA (without load) |
| Analogue output: |  |
| Current output: | 4... 20 mA |
| Load: | $\begin{aligned} & \max . \mathrm{RI}=(\mathrm{Ub}-12 \mathrm{~V}) / 20 \mathrm{~mA} \\ & \mathrm{RI}=600 \text { Ohm bei } \mathrm{Ub}=24 \mathrm{~V}_{\mathrm{DC}} \end{aligned}$ |
| Scanning rate: | 2 ms |
| Voltage output: | $0 . .10 V_{\text {d }}$ |
| Rating: | max. 10 mA |
| Adjustment range: | $25 \%$... $100 \% \mathrm{f} . \mathrm{s}$. |
| Units: |  |
| Distance: | \%, mm, cm, m, inch, feet, |
| Volume: | liter, $\mathrm{m}^{3}$, gallon |
